**DETAILED ACTION*****Allowable Subject Matter***

Claims 1-17 are allowed over the prior art of record as amended in the 8/14/2007 reply and in light of the terminal disclaimer filed 1/31/2008.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device of a safety syringe that includes a flexible holder-supporting seat that is sleeved around and that clamps a needle holder within a front end portion of a syringe barrel. With a flexible sealing member that seals an open front end of a plunger so as to define a vacuuming chamber in the plunger, so that when the plunger moves within the barrel to a front limit position to allow a holder-retaining front portion of the sealing member engages and retains the needle holder thereon. The plunger then pushes the holder-supporting seat to separate from the needle holder such that the sealing member and the needle holder move rearward within the syringe barrel due to negative pressure produced in the plunger, thereby retracting a needle into the syringe barrel.

The closest prior art of record is Yang (USPN7,074,207), however these references do not disclose the device as claimed or described above.

Regarding claims 1, 14 and 16, the closest prior art of record fails to teach among all the limitations or render obvious the flexible sealing member sleeved by said inward flange to seal said front opening of said plunger, said flexible sealing member combining with said needle unit after said plunger being pushed

Art Unit: 3763

to be close to said flexible holder-supporting seat, said flexible holder-supporting seat being sleeved on said spacer portion, and then said needle unit being released from said flexible holder-supporting seat due to said plunger, wherein said flexible sealing member is propped by said needle holder, and then said flexible sealing member is released from said inward flange to be automatically retracted into said plunger body due to a pressure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
